Synopsis

The Strange is a bizarre film experience that will accustom you to the kind of abnormal behavior you may have only heard or read about, but never seen. Why did the couple and the mime have a deadly standoff? What type of job interview traumatized that guy forever? What meal did that teenage girl request before she starred in a snuff film? Why do people drive hundreds of miles to see this obscure Vegas band? What lesson did the Samurai warrior learn from the computer geek who dragged him through a wormhole 100 years into the future? Why does that photographer secretly take pictures of beach people with his disposable camera and frame them like they're his family? The answers are in this odd DVD you hold in your hands. Justin Lin (Fast & Furious, Better Luck Tomorrow) co-directs this dark comedy.
